SUMMARY

Backend-focused engineer building production AI infrastructure. Three published npm packages (@ykstorg/goldset, quickdraw, tripwire) and a public GitHub Marketplace Action. Pulled production patterns from a freelance commission-AI deployment into six Apache-2.0 OSS repositories covering RAG, mid-stream guardrails, eval harnesses, streaming benchmarks, k8s, and in-browser IDE.

TECHNICAL SKILLS

Languages

TypeScript · JavaScript
Python · SQL
Rust (learning)

Backend / Data

Node.js · Express · Next.js
PostgreSQL · pgvector
Prisma 7 · Redis · BullMQ

Infra / AI

Docker · Kubernetes · Helm
Terraform · GitHub Actions · Vercel
OpenAI · Anthropic · Ollama

OPEN-SOURCE PROJECTS

Goldset [Creator](#) · [Maintainer](#) · github.com/ykstorm/goldset

- Three-runner AI eval framework (goldenDataset · llmJudge · structural assertions) shipped as a public GitHub Action.
- PR comment diffs the delta on every push; structural-assertion failures block merge.
- Single bundled 938 KB dist/action.cjs (esbuild) — zero install at consumer side.
- Published as `ykstorg/goldset v0.2.0` on npm and listed on GitHub Marketplace (Continuous Integration).

TypeScript esbuild OpenAI Anthropic GitHub Actions

Anchor [Creator](#) · anchor-iota-ten.vercel.app/playground

- Provenance-first RAG layer with cosine-floor refusal. Returns chunks when similarity ≥ 0.30 ; returns refused: true and zero chunks below floor.
- Idempotent upsert keyed on (sourceType, sourceId) — safe to re-run without duplicates.
- Live demo with 60 embeddings across 16 RERA-verified real-estate projects.
- Adaptive K (precision queries $\rightarrow K=6$, recall queries $\rightarrow K=10$) with provenance array on every response.

Postgres + pgvector Prisma 7 Next.js 15 OpenAI embeddings

Tripwire [Creator](#) · github.com/ykstorm/tripwire

- Mid-stream LLM safety. Token-by-token rule engine aborts the response stream on rule trip.
- Sub-millisecond decision per chunk; zero buffering on happy path.
- User never sees a bad response finish rendering — abort happens before the next token reaches them.
- Published as `ykstorg/tripwire` on npm.

TypeScript Node async iterators streaming abort

Quickdraw [Creator](#) · github.com/ykstorm/quickdraw

- LLM streaming benchmark CLI. Captures TTFT, tokens-per-second, and dollar-per-1K tokens.
- Nightly run at 03:00 UTC across OpenAI + Anthropic; diffs vs. baseline and commits results to repo.
- Published as `ykstorg/quickdraw` on npm.

TypeScript OpenAI SDK Anthropic SDK GHA cron

Stackup [Creator](#) · github.com/ykstorm/stackup

- Local Kubernetes lab spinning up in under 10 minutes via single make up target.
- ArgoCD + Argo Rollouts + Grafana + Prometheus on kind cluster — production-shaped stack for learning.

Kubernetes ArgoCD Helm kind Grafana

Codecraft [Creator](#) · [In Build](#) · codecraft-ai.vercel.app

- In-browser IDE prototype. WebContainers running real Node.js + Monaco editor + Ollama for local AI completions.
- Landing + auth shell deployed; IDE workspace modules in active build.

WebContainers Monaco xterm Next.js Ollama

IN PROGRESS

Anvil — Backend Platform Module Suite — Idempotent BullMQ job queue + retry-safe webhook receiver with exponential backoff and dead-letter handling + Terraform module (Postgres + Redis + worker pool) + Helm chart. Targeting backend-platform roles at Supabase, Trigger.dev, Razorpay-tier.

FREELANCE WORK

Homesty.ai Solo Backend & AI Engineer · Remote · Mar 2025 – Present

- Built production buyer-side AI assistant on Next.js 15 + Postgres + pgvector + Prisma + GPT-4o + Claude streaming.
- Implemented 8-stage chat pipeline: per-IP rate limit -> intent classifier -> RAG retrieval -> streaming -> post-stream audit -> DB log.
- Designed 5-layer anti-fabrication architecture; the patterns shipped as the Anchor + Tripwire OSS repositories.
- 16 RERA-verified projects indexed across two Ahmedabad micro-markets.

Next.js 15 Postgres + pgvector Prisma 7 GPT-4o Claude Sentry Docker

EDUCATION

Manipal University Jaipur — B.Tech, Computer Science · Graduating 2026

Relevant coursework: Distributed Systems, Database Internals, Networks, ML Foundations

RECOGNITION

- Three npm packages published under @ykstormsorg scope
- Goldset listed on GitHub Marketplace (Continuous Integration)
- Six Apache 2.0 open-source repositories with working demos
- Portfolio with live npm + GitHub activity at lakshyaraj-dev.vercel.app

Latest version: github.com/ykstorm/resume · Apache 2.0
